

The learning and development process of school boys and girls, the joys of learning and communal school life are our prime focus.

The basis for a successful school is agreement on essential values and standards.

The mission statement applies to all schools, nursery schools, day schools and care facilities in the school district Breitenrain-Lorraine. The basic policies and values described in the guidelines are intended to provide all concerned with a common thread for their behaviour and actions.

The mission statement defines a forward-looking ideal vision of the school. It is expressed in the form of concrete measures implemented by us within the framework of a common school program.

It guarantees the continuity and quality of our work.

It serves as a basis for the continuous development of our schools.

The mission statement provides the school district with its own identity. It informs the public of our vision and allows them to understand our priorities and objectives.

#### **Professional teaching activity**

We develop, support and promote individual and multi-faceted learning methods.

We strive for an authentic and continuous learning process.

#### **Positive learning atmosphere and stimulating school environment**

We organize regularly community events and encourage a healthy and supportive learning environment and caring attitude.

We strive to ensure constructive and positive co-operation of all parties concerned, in particular with and between pupils, teaching staff, school directors, parents, local authorities and other institutions.

#### **Innovative and open-minded school**

We examine, process and optimize regularly the quality of our schools.

We are not afraid to accept new challenges with a broad and open mind.

#### **School organization with clear and logical structures**

We strive for clear and transparent procedures, decisional processes and information.

We encourage and actively promote suitable forms of consultation.

#### **Dialogue between people from different environments**

We build upon resources and strengths and exchange ideas on the subject.

We are open to diversity and embrace other points of view with respect and openness.

#### **Transparent dealings with the public**

We cultivate good relations with the local community and municipal authorities.

We strive for good networking and cooperation with all persons and institutions involved in the teaching process.
